

CLAIMS

- 1 1. A method of controlling at least one production device for producing a
2 television show, comprising the steps of:
3 establishing a plurality of states of the at least one production device, each state
4 corresponding to at least one operation executable by the device;
5 storing the states of the at least one production device as corresponding memory
6 objects which upon execution cause the one production device to execute the at least one
7 operation, which results in generation of a scene
8 responsive to selection of each memory object, actuating at least one actuator to
9 control an operation of the at least one production device in accordance with the at least one
10 operation associated with that state memory object.

- 1 2. Apparatus for controlling at least one production device for producing a
2 television show, comprising the steps of:
3 means for establishing a plurality of states of the at least one production device, each
4 state corresponding to at least one operation executable by the device;
5 means for storing the states of the at least one production device as corresponding
6 memory objects which upon execution cause the one production device to execute the at least
7 one operation, which results in generation of a scene
8 means responsive to selection of each memory object, actuating at least one actuator to
9 control an operation of the at least one production device in accordance with the at least one
10 operation associated with that state memory object.
